Save Energy - Install Airvector FlexRight!

Commercial & Residential

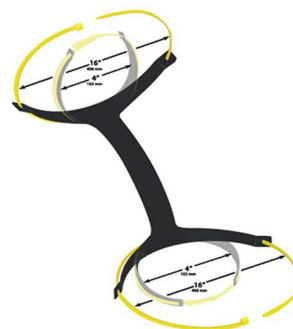

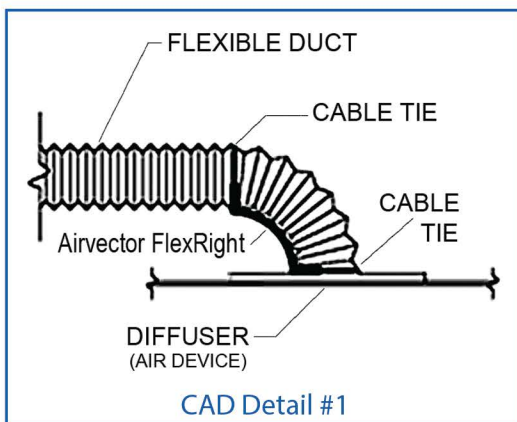

Excessive energy consumption caused by kinked and improperly installed flexible duct is a major problem in commercial & residential HVAC systems.

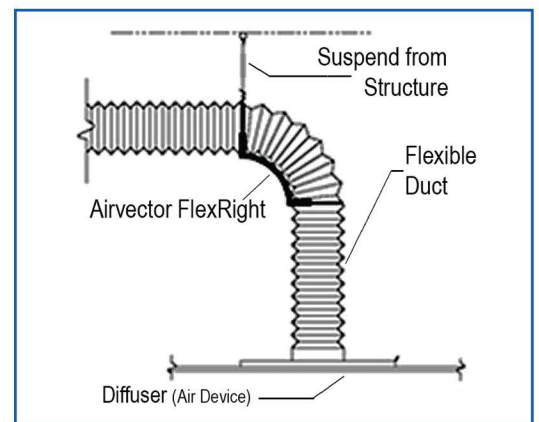

Airvector FlexRight can be retrofitted or installed with new flexible ducts to immediately improve airflow, increase system efficiency and save energy.

Test data

Laboratory tests measuring pressure drop have confirmed as much as an 80% improvement when Airvector FlexRight is used to create a 90-degree flexible duct elbow compared to a kinked flexible duct bend.

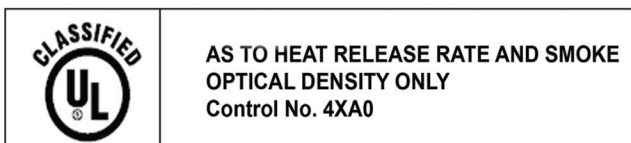

One Size Fits All (4"-16")

- GREEN Product - SAVES ENERGY
- Improves Airflow - Forms Radius 90-degree Elbow
- Eliminates Flex Duct Kinks and Restrictions
- Install on New or Retrofit Existing Flexible Ducts
- Economical & U.L. Listed

- Made from 100% Recycled Materials in the USA
- Adjustable Design - Fits 4"-16" (102 - 406mm)
- Install at Diffusers, HVAC Equipment & Duct Collars
- Works with All Commercial & Residential Flex Duct
