About Us

Founded in 1996 through the acquisition of Airvector, Thermolec's air distribution product line, Alfa Mega Inc. builds on a strong North American legacy established in 1987. Designed and manufactured to high standards of quality and performance, Airvector products are specified today in some of the most prominent buildings across North America.

Our mission, then and now: to deliver reliable, well-designed and accessible air distribution solutions – grilles, registers, diffusers, louvers and access panels – backed by fast lead times and service that meets the expectations of today's HVAC professionals.
